NETWORK READY CONTROL SYSTEM

NRCS Lighting provides single-site area lighting control where Internet may not be available or not preferred for security reasons. SimplySNAP makes it easy to support both new construction and retrofit installations. It is the ideal lighting solution for a variety of applications that include parking lots, sporting arenas, warehouses, college campuses, and more.

HARDWARE

The Central Gateway is a NRCS site controller installed in a NEMA 4X enclosure with local programmable push buttons to manually activate up to 25 Scenes (5 per button) across specific Zones or over the entire lighting installation. This solution includes programmable pushbutton controls in addition to the NRCS browser based interface.

The EMB-S2-A embedded wireless controller opens an exciting integration path for LED Luminaires. The smaller size and lower cost make this DC- powered wireless controller versatile enough to be embedded in nearly any wattage LED Luminaire. Pairing the EMB-S2-A with a SimplySnap Site Controller makes it easy to comply with ASHRAE, Title 24, DLC NLC Indoor/Outdoor, and other energy requirements today and in the future.
